Safety Data Sheet
Acetic Acid, Glacial
Revision Date: 6/15/15

1. PRODUCT AND COMPANY IDENTIFICATION

1.1 Product identifier
Trade name: Acetic Acid, Glacial
Product code(s): 400435, 400436

1.2 Relevant identified uses
Laboratory Reagent

Supplier:
HealthLink, Inc
3611 St Johns Bluff Road, Suite 1
Jacksonville, FL 32224
800-638-2625
Monday-Friday: 8:00 - 5:00 PM

Synonym: None.
Material uses: Laboratory Reagent.
Validation date: 1/15/2015

In case of emergency:
800-424-9300 CHEMTREC (USA)
24 Hours/Day: 7 Days/Week

2. HAZARDS IDENTIFICATION

GHS Classification
Flammable Liquid (Category 3), H226
Skin Corrosion (Category 1A), H314
Serious Eye Damage (Category 1), H318

GHS Label Elements

Pictogram

Signal Word
Danger!

Potential Acute Health Effects:
Very hazardous in case of contact with eye, skin, ingestion and inhalation. Liquid or spray mist may produce tissue damage especially mucous membranes of eyes, mouth and respiratory tract. Will burn eyes and skin on contact. Respiratory tract characterized by coughing, choking and shortness of breath. Inflammation of eyes results in redness, watering and itching. Skin contact results in scaling, redness or blistering.

Potential Chronic Health Effects:
Carcinogenic Effects, NA; Mutagenic Effects, mutagenic for mammalian somatic cells, bacterial and/or yeast; Teratogenic Effects, NA; Developmental Toxicity, NA. May be toxic to kidneys, mucous membranes, skin and teeth.

Precautionary statement(s):
If in eyes or skin: Rinse with water for several minutes. Remove contact lenses, if present and rinse again.
Target Organs
Respiratory Tract

NFPA Rating
Health hazard: 3
Fire: 2
Reactivity Hazard: 0

HMIS Classification
Health hazard: 3
Flammability: 2
Physical hazards: 0

3. COMPOSITION/INFORMATION ON INGREDIENTS

Name | CAS number | % by volume
--- | --- | ---
Acetic Acid | 64-19-7 | 100%
C₂H₄O₂. MW 60.05g | EC-No 200-580-7 |

4. FIRST AID MEASURES

Eye contact: Check for and remove any contact lenses. Immediately flush eyes with water for 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

Skin contact: Flush skin with water for 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

Inhalation: Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

Ingestion: Call medical doctor or poison control center immediately. Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

5. FIRE-FIGHTING MEASURES

Flammability of the product: Flammable

Extinguishing media: Use suitable media for surrounding materials. If water use fog spray, avoid direct stream.

Special exposure hazards: Avoid contact with strong oxidizers

Decomposition products: Decomposition products: carbon dioxide, carbon monoxide

Special protective equipment for fire-fighters: Use self-contained breathing apparatus if necessary.

Explosion hazards: Not-applicable

6. ACCIDENTAL RELEASE MEASURES

Personal precautions: Keep unnecessary and unprotected personnel from entering area. Avoid breathing vapors. Provide adequate ventilation. Do not touch or walk through spilled material. Eliminate sources of ignition. Beware of vapors accumulating to form explosive mixtures.

Environmental precautions: Avoid dispersal of spilled material, runoff and contact with soil, waterways, drains and sewers. Contain spill area.

Spill: Prevent runoff. Contain and collect spillage with absorbent material e.g. sand, earth, vermiculite etc and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Dilute with water and mop-up or absorb with an inert dry material and place in an appropriate waste disposal container. Avoid contact with strong oxidizers.

7. HANDLING AND STORAGE
Handling: Avoid breathing vapors or mist. Keep from sources of ignition and build-up of electrostatic charge. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Store in ventilated areas.

Storage: Store in a well-ventilated, cool area, and protected from direct sunlight. Keep container tightly closed and sealed until ready for use. Storage class, flammable liquid.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure limits:

ACGIH TLV: TWA, 10ppm, STEL15ppm
OSHA PEL: TWA: 10ppm, STEL15ppm
NIOSH REL: TWA: 10ppm, STEL15ppm

Carcinogenicity: IRAC, ACIGH, NTP, OSHA No component of this product at levels ≥0.1% is identified as a carcinogen

Engineering measures: Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne concentrations below any recommended threshold limits.

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating and using the lavatory. Wash contaminated clothing before reusing.

Personal protection
Respiratory: If used in poorly ventilated areas, use a properly fitted, air-purifying or air-fed respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels.

Hands: Chemical-resistant neoprene gloves
Eyes: Safety eyewear; splash goggles, face shield
Skin: Lab coats for personal protective equipment and should be approved by a specialist before handling this product. Depending on volume/conditions a full acid suit, flame retardant, antistatic may be necessary.

Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

10. STABILITY AND REACTIVITY

Chemical stability: The product is stable under normal conditions.
Possibility of hazardous reactions: Under normal conditions of storage and use, hazardous reactions will not occur.
Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.
Conditions to avoid: Heat, sparks and open flame
Materials to avoid: Reactive or incompatible with: oxidizing materials, metals and acids.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should
11. TOXICOLOGICAL INFORMATION

**Acute toxicity**
- Oral LD50: Rat 3,310 mg/kg
- Inhalation LC50: Mouse 1 hr - 5620 ppm
- Dermal LD50: Rabbit 1,112 mg/kg

**Other information on acute toxicity**
- no data available

**Skin corrosion/irritation**
- no data available

**Serious eye damage/eye irritation**
- Eyes: no data available

**Respiratory or skin sensitization**
- no data available

**Germ cell mutagenicity**
- no data available

**Specific target organ toxicity**
- single exposure (Globally Harmonized System)
- no data available
- repeated exposure (Globally Harmonized System)
- no data available

**Aspiration hazard**
- no data available

**Potential health effects**
- **Inhalation** May be toxic if inhaled. Causes respiratory tract inflammation/burns.
- **Ingestion** May be toxic if swallowed and causes burns/tissue destruction.
- **Skin** Toxic if absorbed through skin. Causes skin irritation/blisters.
- **Eyes** Will burn eyes on contact.

**Signs and Symptoms of Exposure**
To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

12. ECOLOGICAL INFORMATION

**Toxicity**
- LC50, rainbow trout >1000 mg/L 96 hr

**Persistence and degradability**
- Expected to be biodegradable

**Bioaccumulative potential**
- no data available

**Mobility in soil**
- no data available

**PBT and vPvB assessment**
- no data available

**Other adverse effects**
- no data available

13. DISPOSAL CONSIDERATIONS

The information presented only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Disposal should be in accordance with applicable regional, national and local laws and regulations.

14. TRANSPORT INFORMATION

DOT (US) UN 2789, Acetic acid, glacial, 8 (3), II
15. REGULATORY INFORMATION

SARA 302: No components are subject to reporting of Title III

SARA 313: No components are subject to reporting of Title III

SARA 311/312: Fire Hazard, Acute Health Hazard, Chronic Health Hazard

WHMIS (Canada): Class B-3: Combustible liquid with a flash point 100°F to 200°F  Class E: Corrosive liquid

DEA List I Chemicals
Precursor Chemicals): Not listed

DEA List II Chemicals
Essential Chemicals):

RTK: Acetic Acid, Glacial, CAS 64-19-7, Listed
- Florida, Massachusetts, Minnesota, New Jersey, Pennsylvania, Rhode Island

California Prop 65 Components: No components listed for causing cancer, birth defects or any reproductive harm.

16. OTHER INFORMATION

National Fire Protection Association (U.S.A.)

Notice to reader
This Safety Data Sheet has been prepared in accordance with the Globally Harmonized System for the Classification and Labelling of Chemicals (GHS). To the best of our knowledge, the information contained herein is accurate. However, neither the above named supplier nor any of its subsidiaries makes any warranty of merchantability or any other warranty, expressed or implied, which respect to such information, and we assume no liability resulting from its use. In no event shall Healthlink be liable for any claims, losses, or damages of any third party or for lost profits or any special, indirect, incidental, consequential or exemplary damages resulting from use of or reliance upon this information.
